| <p>The 16 mm. films listed here are available to schools, sportsmen's clubs, civic groups and like organizations.</p> | Black-White | Color | Length in Minutes |
|---|-------------|-------|-------------------|
| Adventures of a Bunny Rabbit Family life of Cottontail Rabbit. Good for children. | X | | 11 |
| Adventures of a Junior Raindrop Shows damage to soil and flood damage. Cartoon. | | X | 10 |
| Animals and Their Foods Shows how animals find food. | | X | 11 |
| Animals and Their Homes Shown are various type of animal homes. | | X | 11 |
| Animals at Work in Nature Introduces the concept that nature has equipped animals with special parts of their bodies which they use as tools. | | X | 11 |
| Animals in Spring A delightful spring excursion into the natural environs of bluebirds, ducks, insects, frogs, turtles, foxes, etc. | | X | 11 |
| Animals in Winter Shows how animals adapt themselves for winter by changing their color of hair and how they survive the cold. | | X | 11 |
| Arteries of Life Animated drawings showing the sources of life. | | X | 11 |
| As Ye Sow Showing the best conservation practices in Illinois, with accent on restoration of game cover as a benefit to the farmer. | X | | 26 |
| Audubon and the Birds of America Visual biography of John James Audubon. | | X | 17 |
| The Beaver Activities of the beaver in its natural environment. | | X | 11 |
| Better Pond Fishing Explains construction, management, and benefits derived from a farm pond. | | X | 24 |
| Bird Homes Offers a fascinating look at different kinds of bird homes. | | X | 11 |
| Birds Are Interesting A systematic analysis of birds classifying them under swimming and wading birds, birds of prey and perching birds. | | X | 11 |

| The 16 mm. films listed here are available to schools, sportsmen's clubs, civic groups and like organizations. | Black-White | Color | Length in Minutes |
|--|-------------|-------|-------------------|
| Birds in Winter Intimate studies of eight species of birds and how they survive the winter. | | X | 11 |
| Birds of the Countryside Intimate studies of six different species of field birds. | | X | 11 |
| Birds of the Dooryard Robins, cardinals, house wrens, purple martins and other birds which build nests in gardens and near homes are seen and heard. | | X | 11 |
| Birds of the Inland Waterways Intimate studies of nine different species of water-loving birds. | | X | 11 |
| Birds of Our Storybooks The robin, cardinal, crow, owl, sparrow and other birds which children encounter in their stories and texts are shown. | | X | 11 |
| Birds of Prey Activities, development and habitat of four species of birds of prey. | | X | 11 |
| Birth of the Soil Showing how the soil, on which life depends, is made from rock, water, air and sunlight. | | X | 11 |
| Boating Safety Shows proper use to safely handle boats. | | X | 25 |
| Bob White Through the Year Life story of the Bob White quail. | | X | 48 |
| Bushy, The Squirrel Familiarizes children with the habits and characteristics of squirrels. | | X | 11 |
| Camouflage in Nature Thru Color and Form Shows how the changing of color or form of animals enables them to blend in with their background. | | X | 11 |
| Camouflage in Nature Thru Pattern Matching Shows various animals and the importance of camouflage as a natural protection. | | X | 11 |
| Canoeing For Trout Use of fly-rod from a canoe, catching trout in swift waters. | | X | 12 |
| Chain of Life Life story of fish and animals in lakes and forests. | | X | 10 |

| The 16 mm. films listed here are available to schools, sportsmen's clubs, civic groups and like organizations. | Black-White | Color | Length in Minutes |
|---|-------------|----------|-------------------|
| Clean Waters Shows harmful effects of stream pollution to individuals and industries. | | X | 20 |
| Common Animals of the Woods Shows various common animals in their natural habitat. | X | | 11 |
| Conservation of Natural Resources Analyzes the grave problem of the waste of our country's timber, soil, mineral, and wildlife resources. | | X | 11 |
| Cottontail Life story of the cottontail rabbit. | | X | 50 |
| Deer Live With Danger Shows the struggle for survival among animals of the north woods. | | X | 11 |
| Duck Hunter's Dilemma Shows the dilemma faced by present-day hunters and pictures the work of the game biologist. | | X | 20 |
| Face of Lincoln Nationally known sculptor forms the face of Lincoln from clay as he recites different incidents in his life. | X | | 22 |
| Field Trip to a Fish Hatchery Shows a class on a field trip to a fish hatchery. Good for school audiences. | | X | 11 |
| Five Colorful Birds Shows the plumage and some of the nesting and feeding habits of five of our most brilliantly colored birds. | | X | 11 |
| Flowers at Work Shows structure and functions of flowers. | | X | 11 |
| Forests and Conservation Shows selective logging and re-forestation procedure. | X | | 11 |
| Forest Conservation The alarming shrinkage of our forest resources. Scientific method of forest care. | | X | 12 |
| Forest Grows Story of forests as a living community showing the Sequoia National Park in the west. | | X | 12 |
| Forest Produces Wise management of timber and all of its resources and products. | | X | 12 |

| The 16 mm. films listed here are available to schools, sportsmen's clubs, civic groups and like organizations. | Black-White | Color | Length in Minutes |
|--|-------------|-------|-------------------|
| From Trees to Lumber Tells the fascinating and economically significant story of how modern wood-using industries grow and harvest trees. | X | | 14 |
| From Trees to Paper Shows by dramatic photography and simple diagram, how paper is made from trees. | X | | 12 |
| Frying Pan and the Fire Good fire film, taken out west, shows two girls on a picnic. Their campfire breaks loose. | | X | 20 |
| Glory of Spring The magic of time-lapse photography condenses days into seconds as tiny winter buds, shrubs and trees unfold their colorful spring-time flowers. | | X | 10 |
| Gray Squirrel Three young squirrels and their mother showing daily activities and growth. Good for children. | X | | 11 |
| Great River Road Scenic road along the Mississippi river. | | X | 12 |
| Growth of Flowers From the time flowers are planted until they reach full maturity, growth is recorded in time lapse photography. | | X | 11 |
| Halibut Beautiful U. S. Fish and Wildlife film showing the taking of halibut and processing for human use. | | X | 18 |
| Heritage We Guard Use of the forest in providing recreation, employment, watershed protection, hunting, etc. | X | | 30 |
| Honkers in Illinois Depicts the migration of the Canada goose from north country nesting place to winter refuges in southern Illinois. | | X | 40 |
| Honkers Prepaid An Olin-Mathieson production about the Canada goose. | | X | 25 |
| How Animals Help Us Shows how animals are used for food, clothing and beast of burden. | | X | 11 |
| How Animals Live in Winter Shows how animals adapt to winter living. | | X | 11 |

| The 16 mm. films listed here are available to schools, sportsmen's clubs, civic groups and like organizations. | Black-White | Color | Length in Minutes |
|--|-------------|-------|-------------------|
| How Birds Help Us Develops appreciation in beauty of birds and shows how they destroy harmful insects and weeds. | | X | 11 |
| How Nature Protects Animals Portrays representative types in their natural habitat and illustrates different kinds of protection. | X | | 11 |
| Illinois Holiday Illinois Bell Telephone Co. film showing a family visiting the major Illinois parks and memorials. | | X | 27 |
| Illinois Playgrounds Reveals the natural scenic beauties of the State Parks. | | X | 30 |
| Indian Dances Stresses the value of observing and interpreting natural phenomena, those skills so highly developed by the American Indian. | | X | 10 |
| Insect Zoo Shows seven kinds of insects, pointing out characteristics they have in common. Good for children. | | X | 11 |
| It's No Picnic Shows how one man, normally careful, destroyed hundreds of acres of timber. | X | | 30 |
| Know Your Land Depicts Soil Conservation Service land use program. | | X | 10 |
| Learning About Flowers Illustrates the main function of a flower—producing seeds. | | X | 10 |
| Let's Go Fishing Featuring Tony Acetta, one-time bait-casting champion, demonstrating proper practices. | X | | 18 |
| Let's Go Fishing Again Demonstrates proper practices of fly casting. | X | | 20 |
| Lifeblood of the Land Shows disaster of over-grazing and erosion; need for water conservation. | | X | 19 |
| Life Along the Waterways Depicts many forms of plant and animal life found near streams, ponds, rivers and marshes. | | X | 11 |

| The 16 mm. films listed here are available to schools, sportsmen's clubs, civic groups and like organizations. | Black-White | Color | Length in Minutes |
|---|-------------|-------|-------------------|
| Life in a Drop of Water Shows the simplest plant and animal forms carrying on the fundamental life process of nutrition, locomotion, reaction and reproduction. | | X | 11 |
| Life in a Forest Shows how forests, like cities, continually change. | | X | 11 |
| Life of a Plant Shows steps in the life cycle of a typical flowering plant. | | X | 11 |
| Life in a Pond Shows microscopic animals, food-chains and a wealth of plant and animal life in a pond. | | X | 11 |
| Lincoln in Illinois Story of Lincoln's life in our State. | | X | 30 |
| Little Smokey Story of Little Smokey, the bear. | | X | 18 |
| Lost Hunter A simply told story of a man who became lost. | | X | 22 |
| Maine Sardine U. S. Fish and Wildlife film showing taking of Maine sardine. | | X | 18 |
| Making of a Shooter Sporting Arms and Ammunition Manufacturer's Institute films, dedicated to safe handling of fire-arms. | | X | 23 |
| Mammals Are Interesting Defines the concepts needed to understand the distinguishing characteristics of mammals. | | X | 12 |
| Mammals of the Countryside Studies the animals which are a little further afield — animals which might be seen in our forest preserves, parks and on our farms. | | X | 10 |
| Man, Dog and Gun Shows various types of bird dogs in action. | X | | 10 |
| Man's Problems Tells the timely story of the serious problems confronting American citizens in the care, protection, and use of their fresh water supply. | | X | 19 |
| Marsh Marauders Shows how predator animals and birds prey on birds and their nests. | | X | 11 |

| The 16 mm. films listed here are available to schools, sportsmen's clubs, civic groups and like organizations. | Black-White | Color | Length in Minutes |
|---|-------------|-------|-------------------|
| The Meaning of Conservation Helps to develop an appreciation of the growth of the conservation movement as a response to specific conditions. | | X | 11 |
| Monarch Butterfly Story Complete study of the four stages of butterfly growth. | | X | 11 |
| Mother Rabbit's Family Mother Rabbit shows her curious children how to live safely. Good for children only. | | X | 11 |
| Mr. and Mrs. Robin's Family A story of a robin family and their busy lives from early spring until late fall. | | X | 11 |
| Mr. Ringneck Film produced by Conservation Department showing pheasant propagation program in Illinois. | | X | 29 |
| Natural Resources of the Pacific Coast The necessity for conserving our natural resources is presented strikingly. | | X | 11 |
| Nature's Engineers Shows the habits and fight for food by the beaver and his ability to build a lake of his own for winter food supply. | | X | 11 |
| Nature's Plan Portrays the principles and the importance of the natural water cycle. | | X | 14 |
| Nature's Techniques Man's technical achievements were inspired by nature. | X | | 10 |
| On The Wing Goose hunting; some shots in slow motion. | X | | 10 |
| Operation of a Forest Nursery Good for school audiences. | X | | 10 |
| Our Animal Neighbors Lives of ten common small field animals. | | X | 11 |
| Our Natural Resources Story of our Nation's resources and conservation practices. | | X | 10 |
| Our Soil Resources Study of soil. How plants, temperature changes and wind erosion make our soil. | X | | 11 |

| The 16 mm. films listed here are available to schools, sportsmen's clubs, civic groups and like organizations. | Black-White | Color | Length in Minutes |
|--|-------------|----------|-------------------|
| Our Springtime Wildflowers Missouri Conservation Commission film of Midwest wildflowers. | | X | 10 |
| Out of the Woods U. S. Forest Service film which describes the work of a farm forester in the north central U. S. | | X | 12 |
| Outboard Fisherman, U.S.A. U.S. Dept. of Interior movie depicting salt and fresh water commercial fishing. | | X | 26 |
| Pheasant Fever Pheasant shooting—shows training of young dog in field work. | | X | 11 |
| Point Remington Arms movie which shows a Florida plantation hunt for quail and turkey. | | X | 26 |
| Raindrops and Soil Erosion Effect of raindrops on uncovered soil. | | X | 21 |
| Realm of the Wild Scenes of our wild animals taken on U. S. National forests . . . stressing a balance between their food supply and numbers of animals. | | X | 30 |
| Retrievers at Work Training retriever dogs in the field. | | X | 12 |
| Salmon Story Life cycle of the salmon and its processing for American food industry. | | X | 11 |
| Scout in the Forest Film teaches the essential elements of good forestry practices to Boy Scouts. | | X | 23 |
| Seasonal Changes in Trees Presents the seasonal story of the changes in trees. | | X | 11 |
| See How They Swim Waterfowl swimming and feeding habits. | | X | 11 |
| Seed Dispersal Illustrates various ways in which seeds are dispersed by wind, water, and animal. | | X | 11 |
| Seeds of Destruction The dramatic and tragic story of how man is depleting natural resources on which his very life depends. | | X | 11 |

| The 16 mm. films listed here are available to schools, sportsmen's clubs, civic groups and like organizations. | Black-White | Color | Length in Minutes |
|---|-------------|----------|-------------------|
| Shooting Safety Expert advice for junior groups on proper handling of guns. | | X | 26 |
| Shotgun Shooting and How Shows correct handling and use of shotgun. | | X | 12 |
| Shrimp, Please U. S. Fish and Wildlife film showing beautiful scenes on the colorful shrimp industry. | | X | 18 |
| Snakes Characteristics of poisonous and non-poisonous snakes of the U.S. | | X | 12 |
| Snakes—Missouri Habits and life story of snakes in the mid-western states. | | X | 23 |
| Speckled Trout Shows trout fishing throughout Canada. | | X | 11 |
| Spotty: The Story of a Fawn Story of wild fawn in the woods. Good for children. | X | | 12 |
| Spring is an Adventure Shows many of the exciting changes—in trees, flowers, birds and animals, and human activity—which come with spring. | | X | 11 |
| State Parks and Memorials Viewer is taken on an armchair trip to 62 of Illinois' parks and memorials. | | X | 48 |
| Steady Now Proper method of handling and training bird dogs. | | X | 12 |
| A Strand Breaks Shows how man must learn to follow the laws of nature to guard the earth from depletion of its resources. | | X | 25 |
| The Strands Grow Shows how all life is bound together in the vast web of nature's balance in which everything depends upon plant manufactured food. | | X | 25 |
| Strength of the Hills All around conservation film, typical of southern Illinois country. | X | | 12 |
| Sunday in the Park Produced by Illinois Dept. of Conservation. A tour of the many Illinois state parks and memorials. | | X | 25 |

| The 16 mm. films listed here are available to schools, sportsmen's clubs, civic groups and like organizations. | Black-White | Color | Length in Minutes |
|--|-------------|-------|-------------------|
| Sunfish Portrays the life cycle of the sunfish, its activities, and relations to its physical and biological environment. | X | | 11 |
| Sunrise Serenade Portrays the mating ceremonies of three species of grouse. | | X | 25 |
| Tackle Busters The fighting spirit and roughneck tactics of the Canadian Pike make him a fisherman's delight. | | X | 11 |
| This Vital Earth Portrays both the beauty and logic in the organization and balance of the living community. | | X | 11 |
| Tie Your Own Flies Instructions on how to make flies and use them. | | X | 11 |
| To Conserve Our Heritage A Minneapolis-Moline film which shows good land use and conservation practices. | | X | 35 |
| Trees for Tomorrow Shows both early American and modern utilization of wood and how trees are grown for tomorrow. | X | | 18 |
| Tree in a Test Tube Stan Laurel and Oliver Hardy show some of the many things the average man uses which are made of wood. | | X | 12 |
| Tree of Life A dramatic presentation of the importance of forests in our national life. | X | | 22 |
| Trout Factory Operation of a fish hatchery. | | X | 11 |
| Trout Fisherman's Dream A fisherman dreams of catching trout. | | X | 12 |
| Ugly Duckling The famous Hans Christian Anderson story retold in authentic, charming style. | | X | 11 |
| Underwater Adventure Fish life photographed underwater. | X | | 12 |
| Use of Forests Shows many uses of forest trees in our everyday life. | | X | 12 |
| Waterfowl in Action Close-up of ducks and geese showing them in their feeding marshes. | | X | 12 |

| The 16 mm. films listed here are available to schools, sportsmen's clubs, civic groups and like organizations. | Black-White | Color | Length in Minutes |
|---|-------------|----------|-------------------|
| White Splendor Life story and habits of the egret. | | X | 12 |
| Wildfowl in Slow Motion Remarkable study of grace and beauty. | | X | 11 |
| Wildlife and the Human Touch A U. S. Forest Service film, showing good forest management. | | X | 20 |
| Wise Land Use Pays Land management, soil conservation and erosion control by wise planting and contour farming. | X | | 20 |
| Wood Duck Ways University of Minnesota film showing life and habits of the protected wood duck. | | X | 20 |
| Wooden Dollars Shows what constitutes good forestry in Illinois and describes services performed by the State farm foresters. | | X | 24 |
| Yours is the Land Relates importance of conserving the earth's life supporting resources. | | X | 25 |

INSTRUCTIONS

Please Read

ANY ILLINOIS ORGANIZATION may borrow Department of Conservation films, paying only the cost of return transportation. Films are always sent via Parcel Post. All films are on 16 mm. safety stock.

NO OUT-OF-STATE LOANS.

NO PERSON or organization is permitted to make commercial use of Department of Conservation films, delete credit titles or otherwise mutilate the film.

THIS DEPARTMENT DOES NOT LOAN PROJECTORS.

ORDER FILMS at least **two weeks** in advance, giving alternate choice when possible. **Each time you order**, state the **name** of the film wanted, and the **date** you wish to use it. Loans are limited to **two reels**, and use to **two days**.

NEVER RUN SOUND FILMS ON A SILENT PROJECTOR!

RETURN IMMEDIATELY. **Someone is scheduled to use the film you have. Failure to return promptly will debar the user from use of the loan service.**

Films returned by Parcel Post **MUST BE INSURED.**

Return films on the **Department's reels.**

A CARELESS OPERATOR, his machine oiled too much, the sprockets not immaculately clean, the gates gummed, or loops not properly formed can **ruin** a new print at **one showing**. With proper care a new print will last indefinitely. The projector should be cleaned **every** time it is used.

MINOR REPAIRS are made without charge, but serious damage due to faulty operation or equipment is charged to the borrower at twenty cents per foot.

Address all communications to:

INSTRUCTIONS

Please Read

ANY ILLINOIS ORGANIZATION may borrow Department of Conservation films, paying only the cost of return transportation. Films are always sent via Parcel Post. All films are on 16 mm. safety stock.

NO OUT-OF-STATE LOANS.

NO PERSON or organization is permitted to make commercial use of Department of Conservation films, delete credit titles or otherwise mutilate the film.

THIS DEPARTMENT DOES NOT LOAN PROJECTORS.

ORDER FILMS at least **two weeks** in advance, giving alternate choice when possible. **Each time you order**, state the **name** of the film wanted, and the **date** you wish to use it. Loans are limited to **two reels**, and use to **two days**.

NEVER RUN SOUND FILMS ON A SILENT PROJECTOR!

RETURN IMMEDIATELY. **Someone is scheduled to use the film you have. Failure to return promptly will debar the user from use of the loan service.**

Films returned by Parcel Post **MUST BE INSURED.**

Return films on the **Department's reels.**

A CARELESS OPERATOR, his machine oiled too much, the sprockets not immaculately clean, the gates gummed, or loops not properly formed can **ruin** a new print at **one showing**. With proper care a new print will last indefinitely. The projector should be cleaned **every** time it is used.

MINOR REPAIRS are made without charge, but serious damage due to faulty operation or equipment is charged to the borrower at twenty cents per foot.

DEPARTMENT OF CONSERVATION

THE HISTORY OF THE

STATE OF ILLINOIS

MAY 12 1971

UNIVERSITY OF ILLINOIS
CAMPAIGN

INSTRUCTIONS

Please Read

ANY ILLINOIS ORGANIZATION may borrow Department of Conservation films, paying only the cost of return transportation. Films are always sent via Parcel Post. All films are on 16 mm. safety stock.

NO OUT-OF-STATE LOANS.

NO PERSON or organization is permitted to make commercial use of Department of Conservation films, delete credit titles or otherwise mutilate the film.

THIS DEPARTMENT DOES NOT LOAN PROJECTORS.

ORDER FILMS at least **two weeks** in advance, giving alternate choice when possible. **Each time you order**, state the **name** of the film wanted, and the **date** you wish to use it. Loans are limited to **two reels**, and use to **two days**.

NEVER RUN SOUND FILMS ON A SILENT PROJECTOR!

RETURN IMMEDIATELY. **Someone is scheduled to use the film you have. Failure to return promptly will debar the user from use of the loan service.**

Return films on the **Department's reels.**

A CARELESS OPERATOR, his machine oiled too much, the sprockets not immaculately clean, the gates gummed, or loops not properly formed can **ruin** a new print at **one showing**. With proper care a new print will last indefinitely. The projector should be cleaned **every** time it is used.

MINOR REPAIRS are made without charge, but serious damage due to faulty operation or equipment is charged to the borrower at twenty cents per foot.

Address all communication to:

Abraham Lincoln: A Background Study

Re-enacts incidents in Lincoln's life; characterizing him as an exponent of human freedom.

19 min. C all

Abraham Lincoln is My Name

Produced by the Illinois Department of Conservation. Relates incidents in Lincoln's life little known to most viewers.

30 min. C all

Adventures of a Bunny Rabbit

Family life of cottontail rabbit. Good for children.

11 min. B&W p

Air Pollution—Part 1

Shows the critical nature of the problem, surveys measures that have been taken to curb pollution. Shows why anti-pollution efforts have been inadequate, & analyzes proposed solutions to urban air pollution problems.

12 min. C j-a

Alone in the Midst of the Land

This film is a dramatized account of man's destruction of his own environment. It is a picture of man's future, if he continues to destroy his environment with willful abandon.

27 min. C all

Animals and Their Foods

Shows how animals find food.

11 min. C p-i

Animals and Their Homes

Shown are various types of animal homes.

11 min. C p-i

Animals at Work in Nature

Introduces the concept that nature has equipped animals with special parts of their bodies which they use as tools.

11 min. C i

Animals in Spring

A delightful spring excursion into the natural environs of bluebirds, ducks, insects, frogs, turtles, foxes, etc.

11 min. C i

Animals in Winter

Shows how animals adapt themselves for winter by changing their color of fur and how they survive the cold.

11 min. C i

Arteries of Life

Animated drawings showing the sources of life.

11 min. C j-s

Audubon and the Birds of America

Visual biography of John James Audubon.

17 min. C i-s

Bay at the Moon

Remington Arms Co. film dealing with hunting with beagles, fox hounds and coon dogs.

30 min. C all

The Beaver

Activities of the beaver in its natural environment.

11 min. C i

Beaver Valley

Wildlife in the wilderness of the Continental Divide. Today, the rocky wall of the Continental Divide is one of the few remaining green wildernesses in North America. There, in a spot almost inaccessible to man, is Beaver Valley.

32 min. C all

Better Pond Fishing

Explains construction, management, and benefits derived from a farm pond.

24 min. C. s-a

Beyond the Chalkboard

This film shows the many applications of outdoor education activities from the basic nature of math concepts and the use of outdoor exposure as therapy for disturbed children. Good teacher training film. General interest.

25 min. C j-a

Bird Homes

Offers a fascinating look at different kinds of bird homes.

11 min. C i

Birds Are Interesting

A systematic analysis of birds, classifying them under swimming and wading birds, birds of prey and perching birds.

11 min. C i

Birds: How We Identify Them

Shows the various ways by which birds may be identified.

11 min. C p-i

Birds in Winter

Intimate studies of eight species of birds and how they survive the winter.

11 min. C p-i

Birds of Our Storybooks

The robin, cardinal, crow, owl, sparrow and other birds which children encounter in their stories and texts are shown.

11 min. C p-i

Birds of Prey

Activities, development and habitat of four species of birds of prey.

11 min. C i

Birds of the Countryside

Intimate studies of six different species of field birds.

11 min. C p-j

Birds of the Dooryard

Robins, cardinals, house wrens, purple martins and other birds which build nests in gardens and near homes are seen and heard.

11 min. C p-j

Birds of the Inland Waterways

Intimate studies of nine different species of water-living birds.

11 min. C p-j

Boating in Illinois

This film shows scenic and historical features along with safety tips and regulations concerning boating in Illinois.

30 min. C all

Bobwhite Through the Year

Life story of the bobwhite quail. Produced by Missouri Conservation Commission.

45 min. C all

Bushy the Squirrel

Familiarizes children with the habits and characteristics of squirrels.

11 min. C p-i

Calling All Ducks

Duck hunting picture with closeups of birds in flight — good for duck identification.

30 min. C all

Camouflage in Nature Through Color and Form Matching

Shows how the changing of color or form of animals enables them to blend in with their backgrounds.

11 min. C i

Camouflage in Nature Through Pattern Matching

Shows various animals and the importance of camouflage as a natural protection.

11 min. C i

Children of the Colonial Frontiers

Shows the hard work of an early pioneer family when they must take over the duties of the injured father in order to raise food for the coming winter. Story is narrated by oldest child. Good detail of activities such as soap making.

15 min. C all

Clean Waters

Shows harmful effects of stream pollution to individuals and industries.

20 min. C j-a

Common Animals of the Woods

Shows various common animals in their natural habitat.

11 min. B&W i

Conservation and Balance in Nature

This film investigates the balance in natural ecological systems as related to the most critical question of our time — "What is man doing to his environment".

18 min. C j-a

Conservation of Natural Resources

Analyzes the grave problem of the waste of our country's timber, soil, mineral, and wildlife resources.

11 min. B&W j-s

Conserving Our Wildlife Today

By changing the environment man changes the carrying capacity of the land for wildlife. This film explains how the environment can be managed to support wildlife needs more effectively.

11 min. C all

Cottontail

Life story of the cottontail rabbit. Produced by Missouri Conservation Commission.

45 min. C all

Cry of the Marsh

The thousands of marshes and potholes which dot the North American continent are the breeding grounds of millions of wild water birds. These precious wetlands are being drained, victims of man's relentless search for more farmland, more highway right-of-way, and more urban development area. Presented in a powerful and emotional manner.

12 min. C s-a

Deer Live With Danger

Shows the struggle for survival among animals of the north woods.

11 min. C i-j

Duck Hunter's Dilemma

Shows the dilemma faced by present-day hunters and pictures the work of the game biologist.

20 min. C all

Earth: Man's Home

This film explains that air, food and water and a certain temperature range are essential to man's survival. Discusses reasons why some areas on the earth's surface are more densely populated than others, and shows that man has adapted to his surroundings in different ways all over the world.

10 min. C p

Face of Lincoln

Nationally known sculptor forms the face of Lincoln from clay as he recites different incidents in his life.

22 min. B&W all

Find a Float

This film concerns boating safety.

11 min. C j-a

Five Colorful Birds

Shows the plumage and some of the nesting and feeding habits of five of our most brilliantly colored birds.

11 min. C p-j

Flowers at Work

Shows structure and functions of flowers.

11 min. C j-s

Fly Fishing Made Easy

Instructional film showing techniques of fly fishing.

18 min. C all

Forests and Conservation

Shows selective logging and reforestation procedure.

11 min. B&W i-j

Forest Grows

Story of forests as a living community showing the Sequoia National Park.

12 min. C j-s

Forest Produces

Wise management of timber and all of its resources and products.

11 min. C j-s

Life in a National Forest Series:

The Forest Works For Us

Illustrates the various uses and the importance of our National Forests. Most forest land serves more than one use, and many areas serve a combination of several at the same time.

11 min. C p-j

The Forest Gives Us Wood

This film shows that the trees in the forest need care and protection in order to continue supplying wood for the needs of the country.

11 min. C p-j

The Forest Guards Our Water Supply

This film explains that the way to insure a good supply of clean water is to protect the forested land on which the rains fall.

11 min. C p-j

The Forest is Home to Wildlife

Animals who live in a forest must be able to find there all the daily necessities they require. This film shows methods employed to keep members of animals in balance with available food.

11 min. C p-j

Grazing in the Forest

Forage, the food that animals find in a forest, is watched over and managed, enabling the National Forests to be productive.

11 min. C p-j

Fun in the Forest

An increasing number of people are using National Forests for recreational use, and the forests will continue to yield these pleasurable activities only if they are carefully managed.

11 min. C p-j

Frog's Life

Close-up photography records the life cycle of the frog.

11 min. B&W i-j

Get Wet

Training film about what goes on at the water's edge and what we can do to have fun in the water. Unusual movie depicting importance of water to mankind. Homer Groening Inc.

27 min. C all

Gifts of Tomorrow

Relates four vitally important problems, diminishing wilderness, wildlife conservation and management, sportsman-landowner relationships and responsible handling of firearms.

24 min. C all

Glory of Spring

The magic of time-lapse photography condenses days into seconds as tiny winter buds, shrubs, and trees unfold their colorful springtime flowers.

11 min. C all

Grass Blade Jungle

Encourages students to observe and understand the small animal and insect world.

11 min. C i-j

Gray Squirrel

Three young squirrels and their mother showing daily activities and growth. Good for children.

11 min. B&W p

Growth of Flowers

From the time flowers are planted until they reach full maturity, growth is recorded in time-lapse photography.

11 min. C i-s

Gunning the Flyways

Remington Arms Co. film showing all types of duck hunting in the different flyways.

30 min. C all

Gunsmith of Williamsburg (Two Reels)

This is a complete documentary of the manufacture of a rifle of the 1770 period.

58 min. C j-a

Gymnosperms

Demonstrates that gymnosperms are seed plants which bear their seeds on cones. Animations and time-lapse sequences trace life cycle of the pine.

17 min. C j-a

Happy Hunting Grounds

Department of Conservation produced movie tells the story of preserve shooting in Illinois.

22 min. C all

Headwaters

Introduces viewer to citizens of stream world, featuring the smallmouth bass.

28 min. C all

History of the Wild Turkey

Produced by the Missouri Conservation Commission, this film tells the life history of the wild turkey in Missouri. Method of spring hunting of turkey gobblers featured in this film.

20 min. C j-a

Honkers in Illinois

Depicts the migration of the Canada goose from north country nesting place to winter refuges in southern Illinois.

40 min. C all

Honkers Prepaid

An Olin-Mathieson production about the Canada goose.

25 min. C all

How Animals Help Us

Shows how animals are used for food, clothing and beast of burden.

11 min. C p

How Birds Help Us

Develops appreciation in beauty of birds and shows how they destroy harmful insects and weeds.

11 min. C p-i

How Nature Protects Animals

Portrays representative types in their natural habitat and illustrates different kinds of protection.

11 min. B&W i

How to Catch Fish

Shows different types of fishing in Ohio.

30 min. C all

Illinois Fin Fun

Produced by the Illinois Department of Conservation. Sport fishing in Illinois with emphasis on Department-owned waters.

25 min. C all

Illinois Sings

A musical salute to the rich heritage of Illinois, narrated by Eddie Albert.

60 min. C all

Insect Zoo

Shows seven kinds of insects, pointing out characteristics they have in common.

11 min. C all

Islands of Green

Tells of need for additional opportunities for outdoor recreation and conservation education.

25 min. C a

Land of the Prairie Ducks

A vivid portrayal of the conditions found in the pothole country of the Dakotas and Canada where migrating ducks are finding it increasingly harder to find a suitable place to rear their young.

25 min. C all

Learning About Flowers

Illustrates the main function of a flower-producing seeds.
10 min. C p

Learning About Leaves

Designed to give children an appreciation of importance of green leaves to all forms of life.
11 min. C i

Life Along the Waterways

Depicts many forms of plant and animal life found near streams, ponds, rivers and marshes.
11 min. C i

Lifeblood of the Land

Shows disaster of over-grazing and erosion; need for water conservation.
19 min. C a

Life in a Drop of Water

Shows the simplest plant and animal forms carrying on the fundamental life process of nutrition, locomotion, reaction, and reproduction.
11 min. C i-s

Life in a Pond

Shows microscopic animals, food-chains and a wealth of plant and animal life in a pond.
11 min. C i-j

Life in the Forest

Shows how forests, like cities, continually change.
11 min. C i

Life of a Plant

Shows steps in the life cycle of a typical flowering plant.
11 min. C j-s

Lost Hunter

Story of a hunter who became lost. Tells why he got lost, mistakes he made, things he did right and how he is found.
22 min. C j-a

Mammals are Interesting

Defines the concepts needed to understand the distinguishing characteristics of mammals.
12 min. C i

Mammals of the Countryside

Studies the animals which are a little further afield — animals which might be seen in our forest preserves, parks and on our farms.
10 min. C i-j

Meaning of Conservation

Helps to develop an appreciation of the growth of the conservation movement as a response to specific conditions.
11 min. C i-j

Migration of Birds: The Canada Goose

Migration habits, nesting and raising of young Canada geese.
11 min. C i

Missouri Quail Hunt

Filmed by Missouri Conservation Commission. Shows quail hunting scenes. Good bird dog work.
11 min. C all

Monarch Butterfly Story

Complete study of the four stages of butterfly growth.
11 min. C i

Mother Cat and Her Baby Skunks

Shows a mother cat who had adopted some orphaned baby skunks.

11 min. C p

Mother Rabbit's Family

Mother rabbit shows her curious children how to live safely. Good for children only.

11 min. C p

Mr. and Mrs. Robin's Family

A story of a robin family and their busy lives from early spring until late fall.

11 min. C p

Mourning Dove Story

Life story of the mourning dove. Produced by Missouri Conservation Commission.

30 min. C all

Mr. Ringneck

Film produced by Conservation Department showing pheasant propagation program in Illinois.

29 min. C all

Multiply and Subdue the Earth (Two Reels)

This film concerns world population crisis.

67 min. C j-a

Nature's Choice

Superb photography of wildlife and beautiful scenery. Most unique and memorable sequences of the birth of a deer fawn and the metamorphosis of monarch butterfly.

45 min. C all

Nature's Engineers

Shows the habits and fight for food by the beaver and his ability to build a lake of his own for winter food supply.

11 min. C i

Nature's Plan

Portrays the principles and the importance of the natural water cycle.

14 min. C j-s

Our Animal Neighbors

Lives of ten common small field animals.

11 min. C p-i

Our Crowded Environment**The House of Man, Part 2**

Presents the concept of population explosion, shows some of the problems that have resulted, and impresses the present generation with the severity of these problems and encourages students to find viable solutions.

11 min. C i-a

Our Endangered Environment—Soil

With environmental problems threatening to engulf the human race, there is now available a refreshing and interesting new film designed to assist educators in teaching the importance of conservation as a means of survival.

17 min. C i-s

Our Endangered Wildlife—Part 1

Discusses the history of endangered species highlighting the Key Deer. Introduces the idea of management as a science. Rather technical approach.

27 min. C j-a

Our Endangered Wildlife—Part 2

Concentrates on the eagle as an endangered species.

27 min. C j-a

Our Natural Resources

Story of our Nation's resources and conservation practices.
10 min. C i-s

Our Springtime Wildflowers

Missouri Conservation Commission film of Midwest Wildflowers.

Produced by Illinois Department of Conservation. A tour of many Illinois State Parks and Memorials.

25 min. C all

Sunfish

Portrays the life cycle of the sunfish, its activities and relations to its physical and biological environment.

11 min. B&W i

Sunrise Serenade

Portrays the mating ceremonies of three species of grouse.

25 min. C j-a

This is the Mallard

Concerns the story of the mallard duck of the Mississippi Flyway, including Missouri, Illinois and elsewhere in mid-continental North America.

45 min. C all

Troubled Waters

Description of pollution in U. S., using the Ohio River Valley as an example.

28 min. C s-a

Ugly Duckling

The famous Hans Christian Anderson story retold in authentic charming style.

11 min. C p-i

Uses of Forests

Shows many uses of forest trees in our everyday life.

11 min. C i-j

Waterfowl: A Resource in Danger

How can man solve the problem of preserving waterfowl while preventing excessive losses of unharvested grain? By showing what is happening in Western Canada as wild ducks and geese compete with farmers for the crops, the film highlights the problem and emphasizes the need for proper constructive measures.

17 min. C j-s

Waterfowl in Action

Close-ups of ducks and geese showing them in their feeding marshes.

11 min. C all

Way of Life

Study of predation; filmed by the Missouri Conservation Commission.

27 min. C all

What are We Doing to Our World—Part 1

The matter of what constitutes quality environment is discussed. Increasing population and technology produce like increases in sewage, poisonous gases, thermo pollution and radiation problems. A frank discussion of these effects is made in this film.

27 min. C s-a

What are We Doing to Our World—Part 2

A series of problems relating to a quality environment is discussed. An experiment in ecology in the New Hampshire mountains shows wise and unwise use of a natural landscape. A discussion of the Everglades brings out the problem of water and its destruction. The Panama Canal presents a challenge never before considered in changes of animal life from one ocean to another due to man's technological progress.

25 min. C s-a

What the Frost Does

Film for children providing a varied background for observing the evidences of frost.

11 min. C p-i

Wildfowl in Slow Motion

Remarkable study of grace and beauty.

11 min. C all

Wildlife and the Human Touch

Pictures forest animals in their native habitat and explains what U. S. Forest Service is doing to protect animals and their habitat.

20 min. C i-s

Wild River

Natural water supplies, such as the Wild River, provide a haven for woodland creatures, supply water for cities and farms, and supply recreation areas for people. Only through cooperation and applied conservation measures can these rivers be protected for present and future generations.

13 min. C j-a

Wild Wings

Explores Unique Wildfowl Trust at Simbridge, England and shows activities involved in the study and conservation of wildfowl there.

35 min. C j-a

The Winners

Certain mosquitoes and flies have developed a need for chemical repellents in order to complete their life cycle. This film asks who are the winners when man uses chemicals in the battle to "control" insects.

27 min. C j-a

Wonders of Plant Growth

Shows plants growing from seeds, stems, leaves, and roots. Good for children.

11 min. C i

Wood Duck Ways

University of Minnesota film showing life and habits of protected wood duck.

20 min. C all

Wooden Dollars

Shows what constitutes good forestry in Illinois and describes services performed by the State farm foresters.

24 min. C i-a

Your Friend the Water

An animated cartoon story showing two contrasting situations: one, a pure river which serves animals and fish and is a source of drinking water; the other, a polluted stream unfit for any living thing.

6 min. C p-i

Yours is the Land

Relates the importance of conserving the earth's life supporting resources.

25 min. C j-s

Age Level**Key to Abbreviations**

min.—length of film in minutes
C or BW—color or black and white
p—primary
